## [ ]: Removing Stopwords

```
[21]: NewData=[]
      for i in word_tokenz:
          temp=[]
          for j in i:
              if j not in StopWords:
                  temp.append(j)
          NewData.append(temp)
```

```
[ ]: Writing to text file for tagging
```

```
[24]: filetxt=open('fortagadikkuka.txt','w')
      for i in NewData:
          for j in i:
              filetxt.writelines(j)
              filetxt.writelines('\n')
```

```
[ ]: Store taggeddata from text file to an array
```

```
[25]: a=open('taggedadikkuka.txt').readlines()
temp=[]
m=[]
for i in a:
    if i=='.\t\t\t/RD_PUNC\n':
        m.append(temp)
        temp=[]
    else:
        temp.append(i)
```

```
[ ]: Writing the Data from array to csv file along with its label and sense
```

```
[28]: import csv
with open('csvadikkuka.csv','w',newline='') as tagfile:
    writer=csv.writer(tagfile)
    writer.writerow(['sentence','ambiguous_word','label','sense'])
    for i in m:
        writer.writerow([i,' ',1,' '])
```
